Company Profile

Guangzhou Nuocai Digital Products Co., Ltd. is a high-tech enterprise specializing in the development of digital inkjet printing technology, integrating inkjet printer design and development, manufacturing, sales and after-sales service support.

Founded in 2009, the company is located in Nansha District, the southernmost part of Guangzhou City, the southern gate of China. After years of in-depth research and efforts by the team, several series of small inkjet printers and inkjet printers for special industries have been developed successively. Nocai have independent R&D and manufacturing capabilities, and fully implement CE, CB, ISO9001 quality management system and ISO14001 environment. Management system, ISO45001 occupational health and safety management system.

The company adheres to the mission of "strive for the development of the digital printing industry for life!" and continuously promotes the development of digital inkjet printing technology. The products have won 21 national patents, including 9 invention patents, 8 utility model patents, and 4 product appearance patents; 6 high-tech products in Guangdong Province; 1 scientific and technological achievement in Guangzhou.

At present, Nocai has established a sales and service network in more than 50 countries and regions around the world. Using a powerful digital platform and digital inkjet printing technology as the core, Nocai has established a complete supply chain around the world to provide a complete set of color printing needs for different industries, digital inkjet printing solutions.

Nocai continuously enhances its core competitiveness. With the concept of keeping promises and creating value, Nocai brings the equipment and services of the "Nocai" brand to every country in the world, and contributes to the development of China's inkjet printing technology.

Development Path

Past 14 years
On the way to lead the development of the digital inkjet printing industry,
from Guangzhou to the world to expand the territory,
Nocai constantly breaks through and leads the trend.

Founded in 2009

- The company was formally established in Gaotang Industrial Zone, Tianhe District, Guangzhou City, covering an area of 2,000 square meters

2010-2013 growth period

- Independently developed the first domestic self-owned board 6040 small digital inkjet printer, and the world's first model 6090 digital inkjet printer

2014-2017 development year

- Won the title of Top Ten UV Printer Brands in China
- Partner of China Guanghua Science Technology Foundation "Corporate Brand Public Welfare Exhibition"
- Invited to CCTV corporate brand display
- The company moved to Nansha District, Guangzhou City, with a 4-floor single-family factory building and an area of 4,600 square meters
- Special guest of CCTV New Power Entrepreneur Interview "Dialogue Economy"
- Pass GB/T19001-2016/ISO9001:2015 standard
- Obtained the certificate of high-tech enterprise and CE certificate
- CCTV "Ingenuity" column display company

2018-2021 dream year

- Elected as a member unit of Guangzhou Nansha District Intellectual Property Development Promotion Association
- Obtained intellectual property management system certification
- Rated as a contract-abiding and credit-worthy enterprise in Guangdong Province
- The company expanded its production area, covering an area of 10,800 square meters
- Acquired CB certification

2022 innovation year

- Obtained the evaluation certificate of the integration of industrialization and industrialization management system
- Occupational health and safety management system certification certificate
- Obtain the environmental management system certificate

Company Team

At present, there are more than 200 employees, more than 20 R & D engineers, more than 150 production and manufacturing personnel, more than 20 sales personnel, and more than 10 after-sales service personnel.

Honor-Certification

Nocai has obtained a number of international certification.

CE certificate

CB certificate

ISO certificate

Environmental management system certificate

Occupational health and safety management system certification certificate

Honor ——Technical Award

Products have won 21 national patents, including 9 invention patents, 8 utility model patents and 4 appearance patents.

patent

March 2014 New digital printing machine
January 2016 A flatbed printer
December 2017 A rapid installation and disassembly positioning textile printing platform
December 2017 A treadmill textile printer
November 2018 An adjustable digital printer
November 2018 A rust-proof and durable digital printer
November 2018 A digital printer that is easy to clean the nozzle
November 2018 A digital printer with high printing resolution
November 2018 A digital printer that is easy to maintain

Utility model patent certificate

January 2016 A flatbed printer
January 2016 A head structure of a flatbed printer
January 2016 A kind of screen printing and printing all-in-one machine
September 2017 A UV flatbed printer
September 2017 A flatbed printer
November 2018 A cooling device for UV ink printers
May 2019 A device for printing on arcuate surfaces
May 2019 A printer for printing on cards

Appearance patent certificate

September 2017 Flatbed printer
September 2017 UV flatbed printer (0609)
May 2019 Flatbed printer
May 2019 Card Printer

Honor—Innovative Achievements

In the past 14 years, Nocai's innovative achievements are obvious to all

Innovation Achievement

In Dec. 2016, the DX0609 printer was recognized as a high-tech product in Guangdong Province;
In Dec. 2016, the DX0406 printer was recognized as a high-tech product in Guangdong Province;
In Dec. 2018, the NC-A4PLUS flatbed printer was recognized as a high-tech product in Guangdong Province;
In Dec. 2019, the UV0406 third-generation multifunctional flat-panel inkjet printer was recognized as a high-tech product in Guangdong Province;
In Dec. 2019, UV0609XII high-precision flatbed printer was recognized as a high-tech product in Guangdong Province;
In Dec. 2019, the UV0609 third-generation flat-panel inkjet printer was recognized as a high-tech product in Guangdong Province.

Company culture

In the past 14 years, we have been making Nocai's characteristic culture and taking every step firmly.

Interpretation	Slogan	Aim	Business philosophy	Nocai mission	Prospect
Gorgeous color, our promise.	Enjoy the color, enjoy the life. Choose Nuocai, choose the best.	Human oriented, quality priority, Earnestly and sincerely.	Honor the commitment to create value.	Keep struggling for promoting the development of digital printing industry.	Let our equipments and services be in every country of the world.

Why to choose us

Engaged in UV printing equipment for 14 years, it is a high-tech enterprise integrating inkjet printer design and development, manufacturing, sales and after-sales service support.

14 years of industry experience

Provide a complete set of digital inkjet printing solutions for the color printing needs of different industries.

STEP 01

The originator of small inkjet printers

The first 4060 and 6090 digital inkjet printers were produced
The first definition of 40*60, 60*90cm printing format Professional design and development team

STEP 02

Professional R&D and Design team

Keep improving in R&D and design, and design good products for customers with the spirit of ingenuity

STEP 03

Professional sales team

Professional sales engineers answer professional knowledge for customers, sincere cooperation, mutual benefit and win-win situation.

STEP 04

Perfect production and manufacturing system

Unified production and manufacturing, high standards and integration of the whole process, and implement every production link with refined production

STEP 05

Strict quality control process

The full implementation of the ISO quality management system can prevent problems systematically, comprehensively, effectively and preventively.

STEP 06

Professional after-sales service

Professional engineer after-sales service team adopts diversified service methods to provide 7*24 hours full-time online service

STEP 07

NC-UV0406 SERIES

Extreme innovation and continuous surpassing

NC-UV0406 Series development history

NC-UV0406

The first small digital inkjet flatbed printer with self-developed boards in China, which defines the printing format of 60*40cm for the first time.
Configuration: EPSON F186000 single print head, white color print at the same time

2013

NC-UV0406-II

2nd generation small inkjet printer
Configuration: Optimize the appearance of the machine, which is more atmospheric and simple; use EPSON TX800 single print head, and the printing color is delicate; add a cylindrical fixture to support wine bottle printing.

2015

NC-UV0406-III

3rd generation flat & cylinder dual-purpose digital inkjet printer
Configuration: The machine is newly revised; EPSON F1080-A1 single print head is adopted, and the printing thickness is as high as 200mm; the cylindrical fixture is optimized, and the types of cylindrical products that can be printed increase.

2018

NC-UV0406-IV

4th generation of intelligent small digital inkjet printer
Configuration: New suction platform, improved jig to be electric, more convenient to use, and the printing quality has been greatly improved.

2020

NC-UV0406-V

5th generation of high-speed dual-head digital inkjet printer
Configuration: XAAR 1201 with higher precision dual print head is selected to support high-drop printing, further improving printing effect and speed, and enhancing stability.

2022

NC-UV0406-V

Multifunctional Small Digital Inkjet Printer

Features

- The body is small and compact, does not take up space, suitable for personalized customization
- The ink drop volume is 2.5pl, it can realize 4-color output
- Equipped with electric fixture, it can realize 360-degree rotary printing of cylinders
- Self-contained suction platform

Product parameters

Model number	NC-UV0406-V
Print head	XAAR 1201
Print head quantity	2pcs
Nozzle spray force range	2-3mm
Highest print resolution	720*1800dpi
Print size	400*600mm
Print version	White and color print at same time
Print mode	CMYK+W/CMYK+CMYK
Print height	0-180mm
Printer dimension	1443mm*850mm*675mm
N.W.	118KG
Packing size	1.65m*1.03m*0.96m
G.W.	190KG
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	0.93sqm/h-4.53sqm/h
Working environment	Temperature: 20℃-28℃ Humidity: 35%-65%
Power	AC220/110V±10，50HZ~60HZ
Machine power	143W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Quality comes from details

Lifting ink station design
Light-shielding, dust-proof, touch-proof, more safety

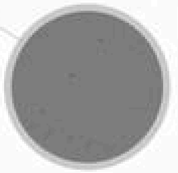

Air-cooling UV lamp
Air-cooling oblique lamp design protects the print head and reduces the impact of reflection,and the intensity of UV light can be adjusted arbitrarily

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

Waste ink alarm
Waste ink alarm function, reminding to clean up waste ink

Standard scale printing platform
Made of aluminum plate material, internal honeycomb structure,Not easy to deform, high flatness

Electric cylinder fixture	Optional 
Cylinder material diameter	Φ30-120mm(No varnish will be printed when choosing rotary mode)
Cylinder length	40~430mm

NC-UV0609 SERIES

Pursue excellence and strive for perfection

NC-UV0609 Series development history

1st generation

2013

The world's first UV flatbed printer model for 6090. It is the first time to define the printing format of 60*90cm, creating a precedent for this format model in the UV printing industry.
Configuration: EPSON F186000 single print head, CMYK + white, white and color print at the same time. Larger format, more convenient for small batch production.

2nd generation

2015

2nd generation 6090 digital inkjet printer
Configuration: Equipped with EPSON TX800 dual print head design, the printing speed is improved. CMYKLcLm + white, the color performance is more delicate, equipped with a new ink supply system, the stability is stronger.

3rd generation

2017

3rd generation of classic digital inkjet printer
Configuration: The appearance design is the classic black and white, and the EPSON TX800 double print head staggered design improves the printing speed, with glossy varnish printing. The humanized design, such as the retractable operating platform, independent flash spray tank, suction platform, make the operation more convenient.

4th generation

2019 X Series

4th generation of high-precision 0609XIII digital inkjet printer
Configuration: The machine is newly revised, equipped with UK XAAR 1201 print heads. The printing effect is comparable to imported similar machines. Equipped with two /three print heads. WIth additional humanized designs such as shading cover and side operation panel.

2020 Pro Series

4th generation of high-speed ProII digital inkjet printer
Configuration: High speed printing machine, it adopts EPSON i3200-U1 dual-print head design, white and color print at the same time, and the printing ink dots are delicate, which is the best choice for mass production.

2020 PE Series

4th generation cost-effective PE digital inkjet printer
Configuration: Equipped with two models of dual or three print head. Using EPSON F1080-A1, the printing quality is bright and the color transition is natural.

5th generation

2022 MAX Series

5th Generation High Precision MAX Digital Inkjet Printer
Configuration: Equipped with 3 EPSON I3200-U1 print heads, the white color varnish print at the same time, and the image picture is highly restored. It can be equipped with an external cylindrical fixture to realize curved surface printing. Integrated fuselage design, the use of new negative pressure ink supply system made the machine more stable.

2020 X Series

5th Generation High Precision XIII Digital Inkjet Printer
Configuration: It adopts British XAAR 1201 three print heads, white color varnish print at the same time .High-definition printing images, and brilliant colors. It can realize 13mm high-drop printing. The external positioning device can solve the positioning problems in hardware, handicrafts and other industries.

2022 PE Series

5th generation cost-effective PEIII-II digital inkjet printer
Configuration: It adopts EPSON i1600-U1 print head , the printing height is raised to 180mm, and an electric cylindrical fixture can be installed , faster printing speed and better quality.

NC-UV0609MAX

New design specially developed for the high-end market

Nice appearance and high productivity tool to meet a variety of application scenarios

Features:

- High-end design, chassis mold opening integrated design, stronger stability
- Adopt EPSON I3200 print head, high resolution (600dpi) can realize up to 4 kinds of color output, fast speed, good quality and durable
- The design of the new negative pressure ink supply system completely bid farewell to the problem of not being able to draw ink from the nozzle
- Equipped with electric fixture, it can realize 360-degree rotary printing of cylinders
- Color control panel, easy to operate

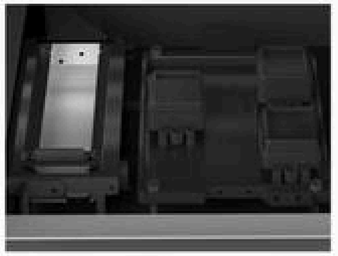

Product parameters

Model number	NC-UV0609MAX
Print head	EPSON I3200-U1
Print head quantity	3pcs
Nozzle spray force range	2-3mm
Highest print resolution	720*2400dpi
Print size	600*900mm
Print version	White and color print at same time
Print mode	CMYK+W+V
Print height	0-180mm
Printer dimension	1676mm*1638mm*994mm
N.W.	226KG
Packing size	1.86m*1.81m*1.05m
G.W.	430KG
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	1.43sqm/h-7.40sqm
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220/110V±10，50HZ~60HZ
Machine power	470W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

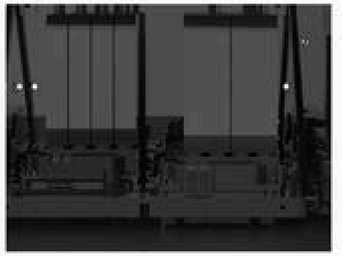

Quality comes from details

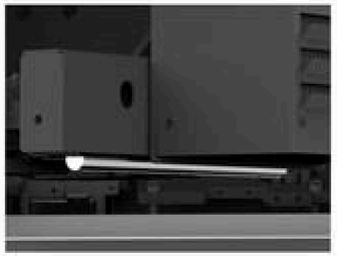

High stability body design
Integrated frame mold opening, high stability

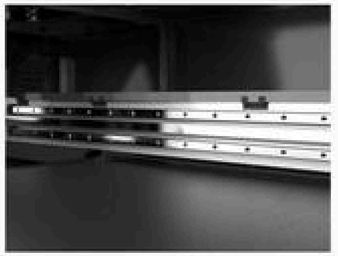

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

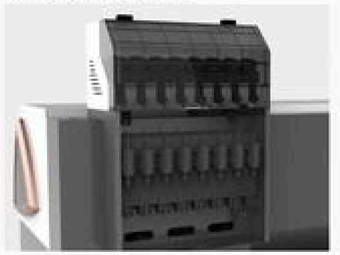

Negative pressure ink supply system
New negative pressure ink supply system, smooth ink supply, completely solve the problem that the nozzle cannot supply ink

Intelligent anti-collision device
Equipped with intelligent anti-collision device on the bottom of the cart, help to protect the print head and the printed products to avoid scratch

Double row linear guide
X-axis adopts double-row linear guides which makes printing more stable and ensures printing accuracy

Intelligent Ink Supply System
With ink stirring and filtering functions to ensure smooth ink supply

Electric cylinder fixture	Optional 
Cylinder material diameter	Φ30-120mm(No varnish will be printed when choosing rotary mode)
Cylinder length	40~430mm

NC-UV0609X

High precision digital inkjet printer

Features:

- High precision, the printing quality is exquisite, and can realize 4-color printing
- Support 0-13mm high drop printing
- Equipped with an intelligent visual positioning system to solve the problem of alignment of special-shaped products
- Humanized intelligent operation panel, convenient and fast
- Built-in functions such as intelligent anti-collision to effectively protect the print head

Product parameters

Model number	NC-UV0609XIII
Print head	XAAR 1201
Print head quantity	3pcs
Nozzle spray force range	2-13mm
Highest print resolution	960*1800dpi
Print size	600*870mm(When print all-white&color&varnish at same time) 600*900(white&color print at same time)
Print version	White and color and varnish print at same time
Print mode	CMYK+W+V
Print height	0-140mm
Printer dimension	1580mm*1480mm*620mm
N.W.	166KG
Packing size	1.81m*1.65m*0.95m
G.W.	280KG
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	1.77sqm/h-5sqm/h
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220/110V±10，50HZ~60HZ
Machine power	265W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Quality comes from details

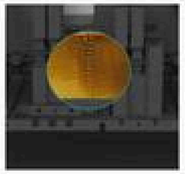

British imported XAAR 1201 print head
High precision, strong jetting force, stable performance

Smart Control Panel
Humanized design, in line with human usage habits, flexible and easy to operate

Air purification system
Absorb dust from the air

Nozzle bottom plate heating device
A heating plate is arranged in the bottom plate, which is suitable for adjusting the humidity of the nozzle and making the ink flow smoothly.

Static elimination device
Easily deal with various problems caused by static electricity and solve printing problems

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

Visual positioning device	Optional 
Visual positioning Print size	600X600mm(When print all-white&color&varnish at same time) 600X570mm(white&color print at same time)

NC-UV0609PE

Cost-effective digital inkjet printer

Features:

- Cost-effective, white color varnish print in the same time, to meet the needs of customers in various industries
- Adopting EPSON I1600 print head, the printing speed is fast
- The beam can be lifted up to 180mm to meet the printing needs of different product thicknesses
- One machine with multiple functions can realize flat/round bottle printing
- Lifting ink station design, precise control of the head position, intelligent protection of the nozzle

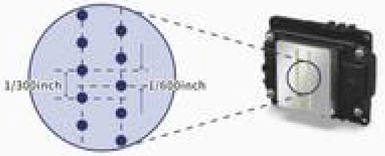

Product parameters

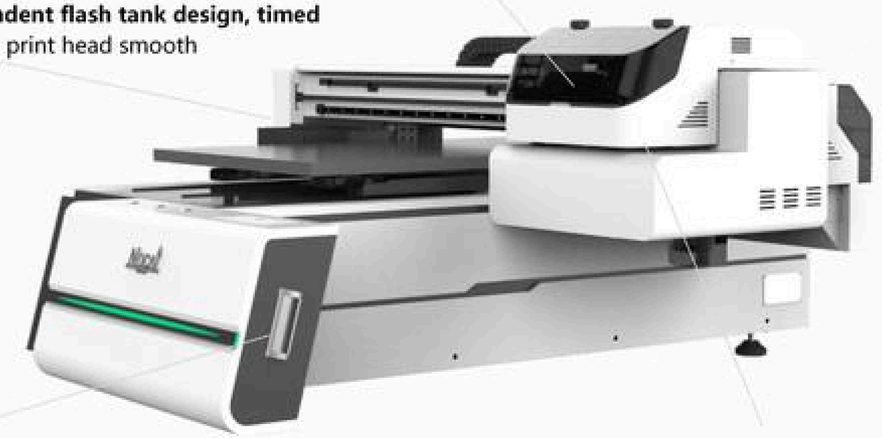

Model number	NC-UV0609PEⅢ-Ⅱ
Print head	EPSON I1600-U1
Print head quantity	3pcs
Nozzle spray force range	2-3mm
Highest print resolution	720*1200dpi
Print size	600*900mm
Print version	White and color and varnish print at same time
Print mode	CMYK+W+V
Print height	0-180mm
Printer dimension	1676mm*1627mm*693mm
N.W.	187KG
Packing size	1.82m*1.83m*0.98m
G.W.	350KG
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	1.64sqm/h-5.09sqm/h
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220/110V±10，50HZ~60HZ
Machine power	245W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Quality comes from details

High performance EPSON I1600 print head
High-precision spray hole arrangement (600npi/2 rows) makes the print head compact in structure, fast in speed, good in quality and durable in use

Left side independent flash tank design, timed
flashing, keep the print head smooth

Retractable control panel
The control panel can be stretched when the platform moved to the front, easy operation

Smart Touch Anti-Collision System
The machine is equipped with an anti-collision sensor device, and the cart will stop automatically after touching, which can protect the print head

Electric cylinder fixture	Optional 
Cylinder material diameter	Φ30-120mm(No varnish will be printed when choosing rotary mode)
Cylinder length	40~430mm

NC-CylinderElf SERIES

Excellence and originality

NC-CylinderElf Series development history

NC-CylinderElf

The first generation of four-station high-speed cylindrical digital inkjet printer

Configuration: Using British XAAR 1201 nozzle, the printing accuracy can reach 2400dpi, the speed can reach 1 minute/piece, and the production efficiency is high.

2019

NC-CylinderElf-II

Second-generation single-station high-speed cylindrical digital inkjet printer

Configuration: Improve the appearance of the machine, and can print special-shaped, tapered and other thermos cups, greatly improving production efficiency.

2020

NC-CylinderElf-III

The third generation large-diameter high-speed cylindrical digital inkjet printer

Configuration: Equipped with XAAR 1201 four nozzles, it can print large-diameter cylindrical thermos cups, with optimized functions and improved printing quality.

2023

NC-CylinderElf-III

Specially designed for the production of vacuum flask industry

Features:

- 360-degree high-speed rotation printing, fast
- High precision, the printing quality is exquisite, and can realize 4-color printing
- The printable diameter is 45-160mm, and the range is larger
- Automatic type measurement for special-shaped products
- Support 13mm high-drop printing, satisfying 360-degree seamless splicing of conical and special-shaped products

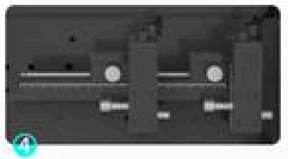

Product parameters

Model number	NC-CylinderElf-Ⅲ
Print head	XAAR 1201
Print head quantity	Standard 3 pcs(optional 4 pcs)
Nozzle spray force range	2-13mm
Highest print resolution	720*1800dpi
Cylinder/cone printing diameter range	Φ45-160mm
Taper printing range	< 5°
Print length	80-280mm
Print mode	CMYK + W+V
Printer dimension	1318mm*910mm*1340mm
N.W.	240KG
Packing size	1.84m*1.12m*1.61m
G.W.	380KG
Rip software	RIIN
Print speed	30s-3min/pcs
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V±10，50HZ~60HZ
Machine power	706W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI

Quality comes from details

Irregular shape testing
The laser automatically measures the size of conventional/special-shaped products to achieve precise positioning

Jig
The jig is continuously optimized, suitable for the adjustment of various products, and equipped with scales, making the operation more convenient

Eliminating ink flying device
Printed products are not affected by flying ink

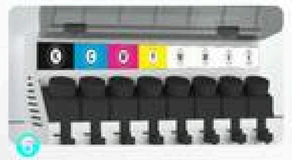

Tilt control button
According to the special-shaped products, the inclination of the jig can be adjusted electrically to reduce the drop and realize oblique printing

Intelligent Touch Anti-Collision System
The machine head is equipped with an anti-collision sensor device, and the ink car will stop automatically after touching, which can protect the print head

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

Intelligent Ink Supply System
Equipped with functions of ink stirring, filter and ink volume alarm to ensure smooth ink supply

NC-UV1013

Innovation goes far, hard work strives to be the first

NC-UV1013

Designed for the large format product market

Features:

- Using Toshiba CE4M print head, the precision is as high as 2400dpi, and the printing quality is exquisite
- 6-color printing, white, color and varnish print at the same time
- 1000*1300mm printing format, can print various products at the same time
- Multifunctional intelligent maintenance system with stable performance and easy operation
- Negative pressure ink supply system, so that the ink supply of the equipment is stable during work

Product parameters

Model number	NC-UV1013
Print head	TOSHIBA CE4M
Print head quantity	4-7pcs
Nozzle spray force range	2-3mm
Highest print resolution	300*2400dpi
Print size	1000*1300mm
Print version	White and color and varnish print at same time
Print mode	CMYKLcLm+W+V/CMYK+W+V/CMYK+W+W+V+V/CMYKLcLm+W+W+V+V
Print height	0-48mm

Packing size	2.72m*2.31m*1.4m
G.W.	/
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	1sqm/h-7sqm/h
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220±10，50HZ~60HZ
Machine power	1457W
Connection method	USB
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Quality comes from details

Double row linear guide
X-axis adopts double-row linear guides, which makes printing more stable and ensures printing accuracy

Negative pressure ink supply controlsystem
The negative pressure ink supply system is adopted to make the ink supply ofthe equipment more stable in operation

Suction platform
The suction platform makes the printed products flat and standard, which is convenient for product positioning

NC-UL600-II

Inspire innovation, refine and improve

NC-UL600-II

Designed for the travel luggage

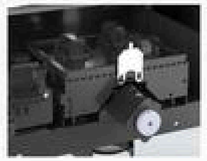

Features:

- Support printing at a height of 600mm to meet the printing needs of different product thicknesses
- Equipped with XAAR1201 nozzle, and the printing color is rich and delicate
- Simultaneous output of white, color and varnish, supporting 2-13mm high drop printing
- Multifunctional intelligent maintenance system with stable performance and easy operation
- Suitable for multi-industry applications such as suitcases and home appliances

Product parameters

Model number	NC-UL600-Ⅱ
Print head	XAAR 1201
Print head quantity	3个
Nozzle spray force range	2-13mm
Highest print resolution	960*1800dpi
Print size	900*700mm
Print version	White and color and varnish print at same time
Print mode	CMYK+W+V/CMYK+W+CMYK
Print height	0-600mm
Printer dimension	1940mm*1790mm*1540mm
N.W.	465KG
Packing size	2.15m*2.01m*1.85m
G.W.	700KG
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	/
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V±10，50HZ~60HZ
Machine power	243W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

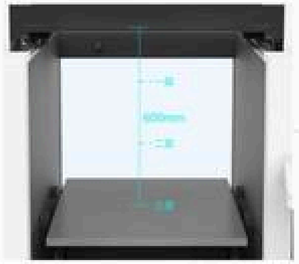

Quality comes from details

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

Intelligent Ink Supply System
Equipped with functions of ink stirring, filter and ink volume alarm to ensure smooth ink supply

Translucent shading cover
Light-proof, dust-proof, and more safe.

600mm print height
Support 600mm height printing to meet the printing needs of different product thicknesses

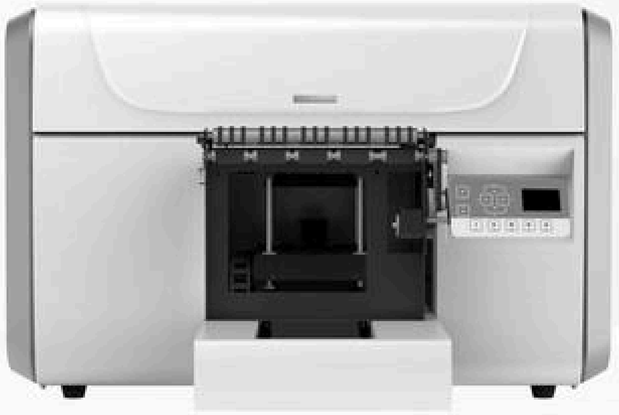

Foot Cup/Pulley
Adjust the height of the foot cup according to the de mand to ensure the balance of the equipment and prevent the displacement of the equipment. The pulley is for moving easily

NC-UVA3MAX

New, sincerity;
Enlightenment, future

NC-UVA3MAX

Designed for the desktop personalization product market

Features:

- The resolution can reach 1200dpi, and it can output up to 8 colors
- Lightweight design, compact body, does not take up space
- Humanized design operation panel, convenient and fast
- Versatile, supports flat and roll printing
- White, color and varnish output at the same time

Product parameters

Model number	NC-UVA3MAX
Print head	EPSON I3200
Print head quantity	1pcs
Nozzle spray force range	2-3mm
Highest print resolution	960x1200dpi
Print size	297*420mm
Print version	White and color and varnish print at same time
Print mode	CMYK+W+V/CMYKLcLm + W/CMYKLcLmLkLlk/CMYK
Print height	0-90mm
Printer dimension	1000mm*902mm*592mm
N.W.	78KG
Packing size	1.11m*1.01m*0.76m
G.W.	110KG
Rip software	Future Rip
Print speed	0.28-3sqm/h
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220/110V±10，50HZ~60HZ
Machine power	140W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png

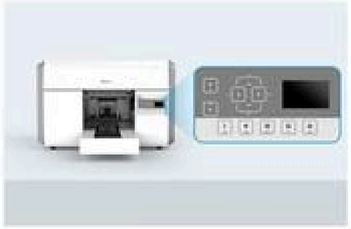

Quality comes from details

Lightweight design
Compact body, does not take up space

High-precision printing technology
EPSON 13200 Print head1,200dpi reaches the highest resolutionin the industry, creating excellent printquality

Multifunction control panel
Humanized design, in line with human habits. flexible and easy operating

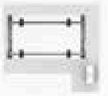

Advanced print quality
Support white color varnish to print aone time high-speed printing, easy tachieve high-quality printing pictures

Intelligent Ink Supply System
New ink cartridge design, with automatic 4 color+white+varnish ink circulation,ink shortage alarm function

Multifunctional designOne machine with three uses
One machine. two needssupport flat and roll printing

Rolling fixture	Optional 	Electric cylinder fixture	Optional 
Support roll paper width	30-250mm	Cylinder diameter	25~80mm
Inner diameter of roll paper tube	three-inch core	Cylinder length	20~210mm

NC-Cyclone SERIES

Ingenuity to the original intention, original intention to the future

NC-Cyclone 120 (S3200)

Designed for efficient production.

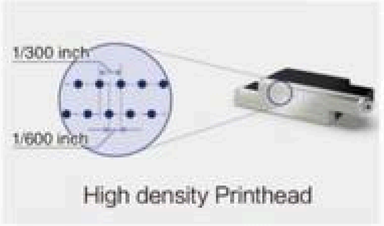

Features:

- Unique head splicing technology, fast printing speed, 17 m/min
- Equipped with 8 EPSON S3200 heads, with high printing accuracy and bright colors
- White, color & varnish print out at the same time and can print with emobbsing effect
- Multifunctional intelligent maintenance system with stable performance and easy operation
- Wide range of industry applications, suitable for mass production and assembly line operations

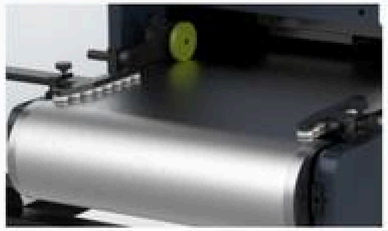

Product parameters

Model number	NC-Cyclone-120
Print head	EPSON S3200-U1
Print head quantity	4pcs
Nozzle spray force range	2-3mm
Highest print resolution	1800x600dpi
Print width	120mm
Print version	White, color, varnish
Print mode	CMYK+W+V
Print height	0-100mm
Printer dimension	1940mm*1230mm*1500mm
N.W.	/
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	17.7m/min
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V，50HZ~60HZ
Machine power	/W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

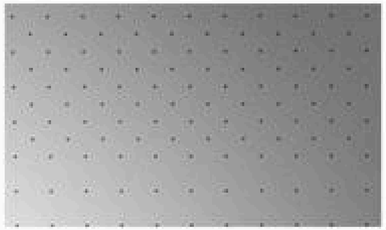

Quality comes from details

EPSON S3200-U1 print head
Compact in structure, fast in speed, good in quality and durable in use

Fixture position
Adjust the guiding position depends different product, Barrier-free mass production

Vacuum table
Conveyor-type vacuum platform makes printing safer

NC-Cyclone 120 (I3200)

Designed for efficient production.

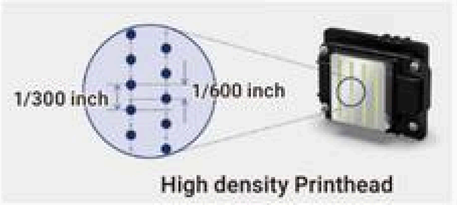

Features:

- Unique head splicing technology, fast printing speed, single color up to 17m/min
- Equipped with 4 EPSON I3200 heads which with high printing resolution, up to 1800dpi
- Four-color printing, rich and delicate colors, restore the real feeling
- Multifunctional intelligent maintenance system with stable performance and easy operation
- Wide range of industry applications, suitable for mass production and assembly line operations

Product parameters

Model number	NC-Cyclone-120
Print head	EPSON I3200-U1
Print head quantity	4pcs
Nozzle spray force range	2-3mm
Highest print resolution	1800x600dpi
Print size	120mm*45mm
Print version	Color only
Print mode	CMYK
Print height	0-80mm
Printer dimension	1940mm*1230mm*1500mm
N.W.	/
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	30m/min(MAX)
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V，50HZ~60HZ
Machine power	/W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Quality comes from details

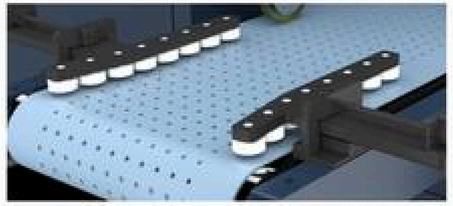

EPSON I3200-U1 print head
High precision, high efficiency, bright and delicate colors.

Intelligent ink supply system
With ink stirring, filter, and ink volume alarm functions to ensure smooth ink supply

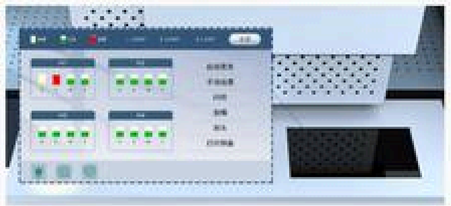

Smart Touch Collision Avoidance System
The bottom of the ink car is equipped with an anti-collision sensing device to protect the print head and the product from being scratched

Vacuum table
Made of aluminum plate, not easy to deform, high flatness

Lifting ink station design
Driven by motor, accurately control the position, intelligently protect the print head

Intelligent print head maintenance system
Different from the traditional ink-pressing technology, it can perform ink-pressing and cleaning for a single print head to save ink volume

NC-Cyclone 400

Designed for efficient production.

Features:

- Equipped with 24 EPSON I3200 heads, unique heads splicing technology, fast printing speed, bi-directional printing only takes 8 seconds
- The body is made of natural marble material, which is durable and stable
- 40*65mm standard scale vacuum platform, convenient for placing and positioning printing materials, the platform can be disassembled and replaced
- White color varnish is produced at the same time, which can realize embossed varnish effect, and support 2-15mm high drop printing
- Intelligent printhead maintenance system, which can press ink and clean for a single printhead to save ink

Product parameters

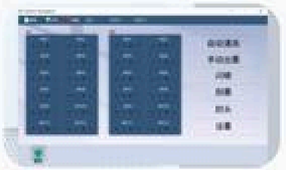

Model number	NC-Cyclone-400
Print head	EPSON I3200-U1
Print head quantity	24pcs
Nozzle spray force range	2-15mm
Highest print resolution	960*2400dpi
Print size	370*600mm
Print version	White and color and varnish print at same time
Print mode	CMYK+W/CMYK+W+V
Print height	0-50mm
Printer dimension	2630mm*1630mm*1710mm
N.W.	1700KG
Packing size	2.8m*1.8m*2m
G.W.	1800KG
Rip software	RIIN
Print speed	9.27sqm/h-26.50sqm/h
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V±10，50HZ~60HZ
Machine power	/W
Connection method	USB
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI

Quality comes from details

Lifting ink station design
Precisely sealing the print head makes it more stable.

Natural marble structure
The beam,base and body are all made of marble structure.
which makes printing more stable.

Intelligent print head mainte nance system
Can be used for single nozzle ink pressing and cleaning, saving ink.

Double-row UV lamp control technology
Intelligent control of UV lamp parameters, can switch frosting and brightening effects at will.

NC-DLP-120

Virtue and technology are both fragrant,
and wisdom creates a win-win situation

NC-DLP-120 (Multifunctional digital inkjet label printing machine)

Designed for efficient production in the label industry

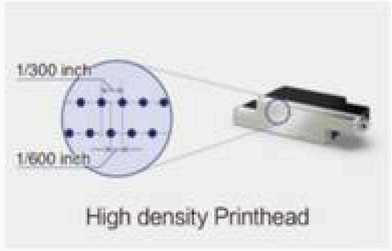

Features:

- Equipped with 6 EPSON S3200 heads with high printing speed, and the printing speed range can reach up to 30m/min
- Prints color and white inks which can flexibly meet the needs of pre-printing or post-printing white on transparent film media
- Realize variable data printing, greatly improving the productivity of short-run label printing
- Automatic deviation correction function, automatic calibration for paper feeding, reflecting excellent controllability
- Negative pressure circulation ink supply system, completely bid farewell to the ink supply problem

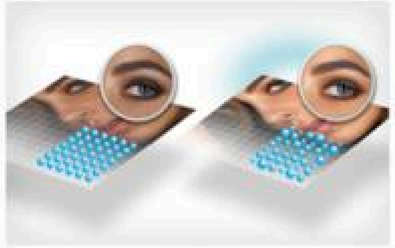

Product parameters

Model number	NC-DLP-120
Print head	EPSON S3200-U1
Print head quantity	6pcs
Nozzle spray force range	2-3mm
Highest print resolution	1200x600dpi
print width	0-120mm
Print version	White, color
Print mode	CMYK+W
Print height	0.08-2mm
Printer dimension	2610mm*1420mm*1690mm
N.W.	/
Rip software	FlexiPRINT MiniServer 19 Nocai Edition
Print speed	30m/min(MAX)
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC380V，50HZ~60HZ
Machine power	/W
Connection method	Network cable
Graphic format	Tiff,Jpg,Eps,Pdf,Png,AI,Psd

Product Features

EPSON S3200 print head
Resolution up to 1200×600dpi,
High-precision small font size output to meet the high-quality label output needs for users

Variable data printing
Under the premise of uninterrupted printing process,It can continuously print out different graphic data

Variable ink drop technology
Freely control the size of the jetted ink droplets, thereby reducing the graininess of the picture and making the printing quality more delicate

Automatic correction function
When the edge sensor detects that the material is skewed,it can automatically correct the deviation, with high precision and good effect

NC-HIJ-A3

Printing without borders,
innovation and forge ahead

NC-HIJ-A3 (Digital carton printing machine.)

Designed for efficient production in the carton industry

Features:

- Equipped with HP heads, with high printing speed and the printing speed can reach 80m/min
- The head can be raised to 450mm to meet the printing needs of different product thicknesses
- Computer touch screen, automatic operation
- Multifunctional intelligent maintenance system, stable performance and easy operation
- Suitable for mass production and assembly line operation

Product parameters

Model number	NC-HIJ-A3
Print head	HP print head
Print head quantity	1pcs
Nozzle spray force range	2-3mm
Highest print resolution	1200x1200 dpi
Print size	Width 305* height 450mm, no limit in length
Print version	Color only
Print mode	CMYK
Print height	450mm
Printer dimension	1565mm*1130mm*1140mm
Rip software	Print Tools
Print speed	10-80m/min
Working environment	Temperature：20℃-28℃ Humidity：35%-65%
Power	AC220V±10，50HZ~60HZ
Machine power	243W
Connection method	Network cable
Graphic format	PDF/TIF/JPG
Ink Type	Water ink

Keep improving, casting high-quality products

Vacuum platform
Conveyor-type vacuum platform makes printing safer

Jig positioning function
Adjust the guiding position according to different products, and mass production without obstacles

Built-in printing system
Built-in integrated printing system, U disk direct insertion, easy to understand and operate

APPLICATION

Ⅰ.Industry application

Ⅱ.Process application combined with UV

——UV DTF

——Bronzing

Industry application

UV printers are widely used in industries and are suitable for personalized customization in all walks of life.

Stationery industry

Pens, notebooks, pencil cases, school bags, rulers, etc.

Cosmetics industry

Skin care products, cosmetics, makeup tools, nail pieces, perfume bottles, makeup gift boxes, etc.

Toy industry

Pens, notebooks, pencil cases, school bags, rulers, etc.

Handicraft industry

Keychains, bowling balls, fridge magnets, brooches, keyboards, buttons, etc.

Home improvement industry

Wardrobe, decorative painting, lampshade, screen, background wall, desktop lamp

3c digital industry

Keyboards, mobile phone cases, mobile power supplies, small speakers, headphones, small appliances, mouse keyboards, etc.

Hardware industry

Electronic product gift boxes, souvenirs, business gifts, home decoration gifts, etc.

Gift industry

Electronic product gift boxes, souvenirs, business gifts, home decoration gifts, etc.

Thermos cup industry

Children's thermos cups, coke cups, cans, wine bottles, cylindrical electronic products, etc.

Luggage industry

Trolley case, wallet, backpack, tote bag, packing box, etc.

Appliance industry

Small refrigerator, air conditioner, kettle, etc.

Advertising industry

Business cards, posters, signage, light boxes, etc.

Process application combined with UV - DTF Printing

Printed on the crystal label film by a UV printer, and transferred by a laminating machine at a high temperature, the effect of the crystal sticker process appears.
As people require the packaging of products to be high-grade, exquisite, environmentally friendly and full of personalization. Therefore, the crystal paste process is loved by people because of its unique surface finishing effect, and it is used in high-end packaging such as cigarette labels, cosmetics, and gifts.

Process application combined with UV - bronzing process

Use a UV printer to print bronzing varnish onto the material, and then emboss the bronzing film on the varnish by high-temperature pressing to achieve the effect of the bronzing process.
With the development of the printing and packaging industry, people require product packaging: high-end, exquisite, environmentally friendly and personalized. Therefore, the hot stamping process is loved by people because of its unique surface finishing effect, and it is used in high-end packaging such as cigarette labels, cosmetics, and gifts.

SERVICE

Ⅰ.Manufacturing

Ⅱ.Quality control

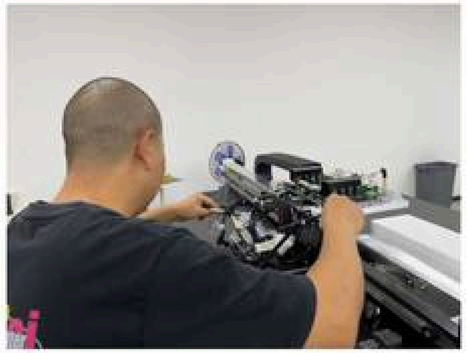

Ⅲ.After-sales service

Manufacturing

Nuocai has a complete production and manufacturing process. The products have gone through 22 strict manufacturing processes, refined management, and scientific production are more efficient.

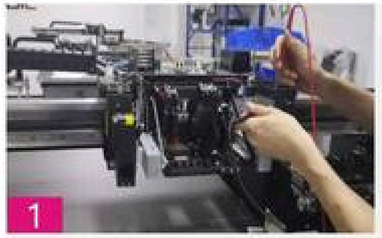

Quality control

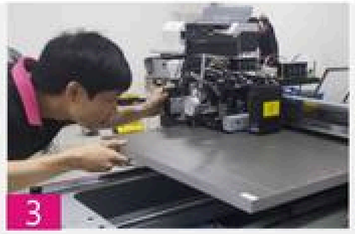

The rigorous quality control system can prevent problems systematically, comprehensively, effectively and preventively, and will be continuously controlled and dynamic.

line check

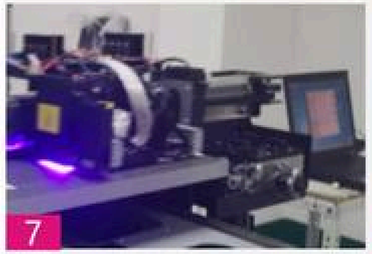

Nose angle load test

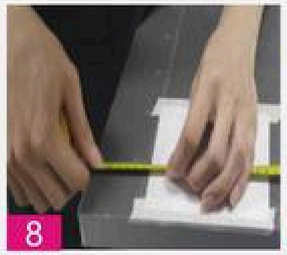

Ink cart bottom plate and platform level inspection

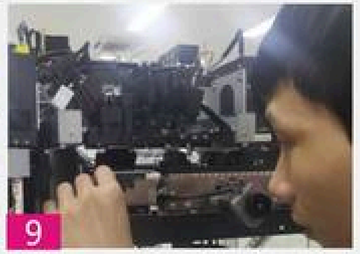

Grating, suction fan, peristaltic pump inspection

Online print test

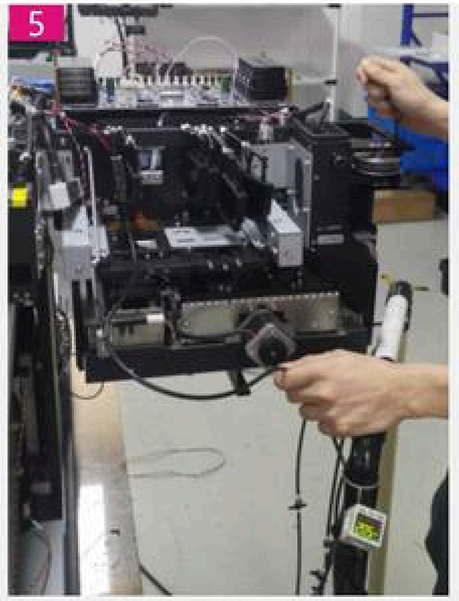

Print wireframe and calibrate inspection

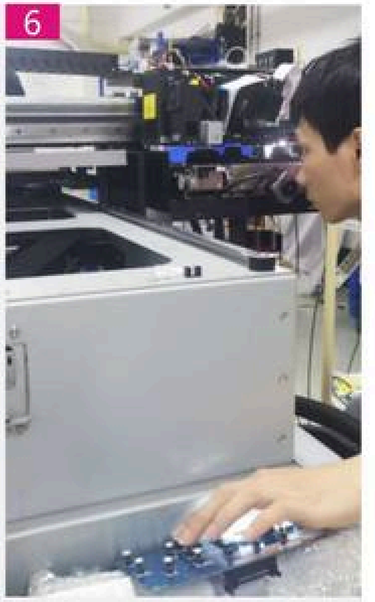

Nozzle height, infrared sensor height, wiper nspection

Beam fixing screws screw glued

Ink path and blotter inspection

Alignment of ink-absorbing pad, up-and-down movement of lifting ink station examination

After-sales service

A strong after-sales service system provides customers with timely and professional technical support and solutions to ensure that customers can get the best experience during use

Troubleshooting

According to the scope of service promised in the contract; the company sends after-sales engineers to come to troubleshoot and restore normal production as soon as possible

Service tracking

Regularly take the initiative to return to customers; understand the use of equipment and listen to customer suggestions and provide technical guidance and make records and archives

Consulting service

Professional engineer after-sales service team adopts diversified service methods to provide 7*24 hours full-time online service

Service Guarantee

The equipment provides one year free warranty and lifetime maintenance service as standard

COOPERATION

Ⅰ.Global Layout

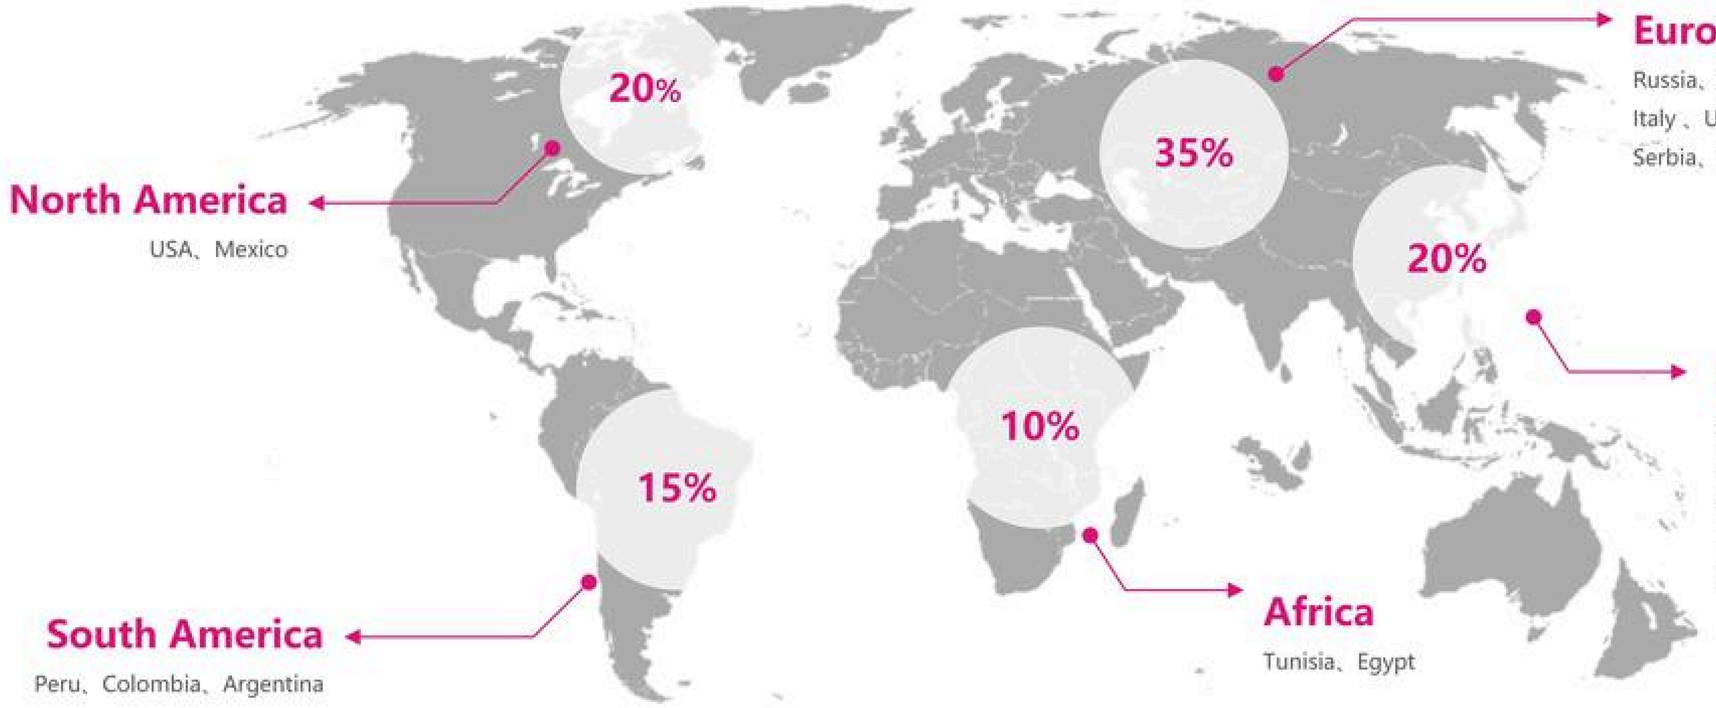

Ⅱ.Domestic agency

Ⅲ.Market prospect

Ⅳ.Industry Competitive Advantage

Global Layout

We have always regarded the globalization of the market as an important opportunity, and at the same time have mastered the strategy to deal with the challenges. We keep pace with the times and bring our equipment and services to every country in the world.

North America

USA、Mexico

Europe

Russia、Spain、Poland、Portugal、England、Italy 、Ukraine、Greece、 Romania、Bulgaria、Serbia、France、Czech、Moldova

Asia

Market prospect

strategic support

●In May 2015, the State Council released the "Made in China 2025" strategic plan

The program proposes to focus on the development of intelligent equipment and intelligent products, promote the intelligentization of the production process, cultivate new production methods, and comprehensively improve the intelligent level of enterprise research and development, production, management and service. With the continuous popularization of intelligent manufacturing in the future, intelligent packaging and printing will become the future development direction of the industry.

●It is pointed out that it will promote the improvement of the system and mechanism for the green development of the printing industry

Promote the construction of a pioneer zone for the coordinated development of the printing industry in Beijing, Tianjin and Hebei, promote the construction of an innovative highland for the integrated development of the printing industry in the Yangtze River Delta region and a deepening open connection platform for the printing industry in the Pearl River Delta, and promote digital printing. Accelerate the development of new kinetic energy, promote the improvement of standards and technical support for the green development of the printing industry, promote the implementation and coordination of major projects for the green development of the printing industry, and promote the establishment of the China Printing Industry Innovation Fund. The publication of the opinions will play an important leading role in the green development of my country's printing industry.

●In December 2022, the State Administration of Press and Publication released the "Special Plan for the Development of the Printing Industry during the 14th Five-Year Plan Period"

The development plan clearly stated that during the "14th Five-Year Plan" period, we must continue to promote the development of "green, digital, intelligent, and integrated" in my country's printing industry, promote the optimization and upgrading of industrial structure, and continue to improve the scale and intensiveness of my country's printing industry. The level of specialization and specialization will be realized as soon as possible from a printing power to a printing power.

Industry Competitive Advantage

Multiple policy support

The state has issued a number of policies to vigorously support the development of the printing industry.

Wide range of market applications

UV printers are used in a wide range of industries. At present, common application industries include: gift packaging industry, home decoration industry, advertising industry, stationery industry, beauty industry, 3C digital product industry, etc.

Green and Environmentally friendly Energy saving

The entire curing system of U printing is a solvent-free system V, which will not cause harmful environmental pollution, has less waste, and saves energy, responding to the green environmental protection requirements of sustainable development.

High rate of return

The display of UV process is very rich. Nuocai UV printer has complete functions and can print a variety of products in color. It has fast printing speed, good quality and low scrap rate. It is the best choice for investment and entrepreneurship.

Guangzhou Nuocai Digital Products Co.,Ltd

Nuocai is the manufacturer and specialist of digital inkjet printer located in Guangzhou, China. We are willing to cooperate with local distributors all over the world to provide our products and services to local customers.
