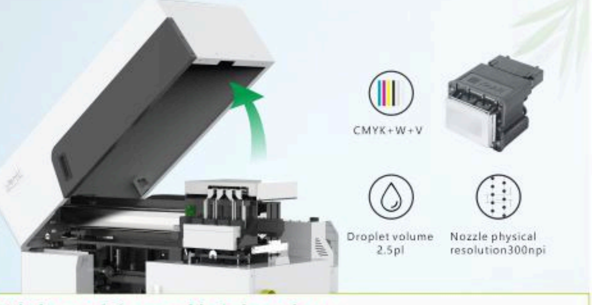
NOCAI
Digital printer

NC-CylinderElf-III

High speed thermos cup digital inkjet UV printer

14 years of strong brand, source manufacturer. The high-speed thermos cup digital inkjet printer independently developed by Nocai can realize 360° rotation printing and supports seamless, 5D relief, high drop and other forms of printing. The printing speed is as fast as 30 seconds per piece.

Product features



High precision and bright colors

Using XAAR 1201 print head, the ink drop volume is 2.5pl, the printing quality is exquisite, and the true color of the image is highly restored.

High drop printing creates more powerful shapes

It supports 13mm high height printing, and the laser automatically measures the product size to achieve precise positioning and easily and perfectly print products of the opposite sex.

Large-size printing creates more possibilities

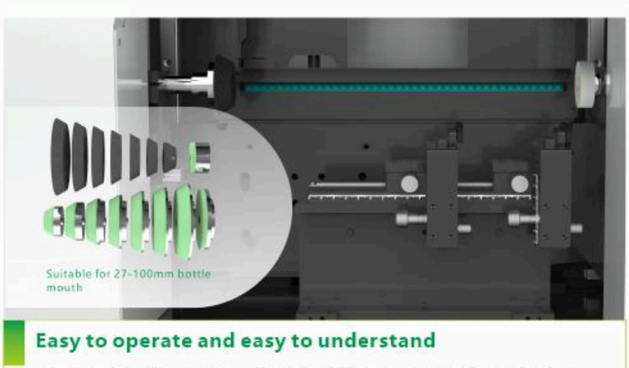
The printing length is 80-280mm and the printing diameter is 45-160mm, which can meet the needs of various types of products such as thermos cups and pots, cylindrical electronic products, wine bottles, etc., and has a wide range of applications.

Fast printing speed and stable production

The third-generation digital inkjet printer for thermos cups adopts spiral printing technology and produces 360° white varnish at the same time. The printing speed is as fast as 30 seconds per piece, which is suitable for mass production mode.

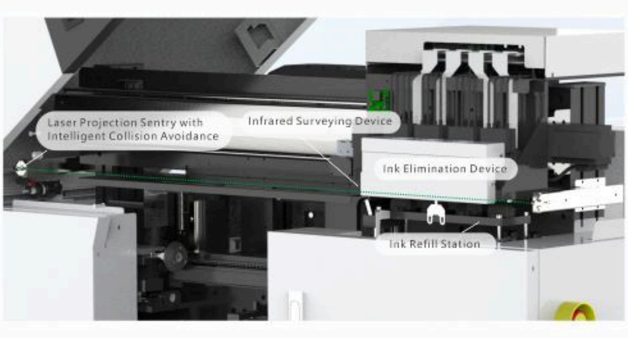
The ultimate pursuit of intimate experience

The tilt control button can adjust the tilt according to the shape of the product, reduce the drop, and achieve tilt printing.



Easy to operate and easy to understand

The multi-diameter cylindrical jig can meet the printing needs of a variety of products. The bottle adjusting jig is equipped with scale adjustment for more convenient operation.

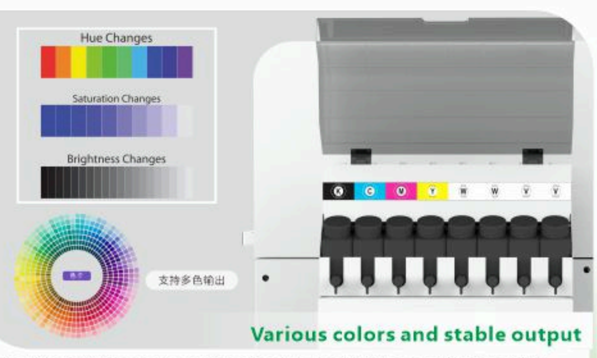


Laser Projection Sentry with Intelligent Collision Avoidance
Infrared Surveying Device
Ink Elimination Device
Ink Refill Station

Carefully protected and durable

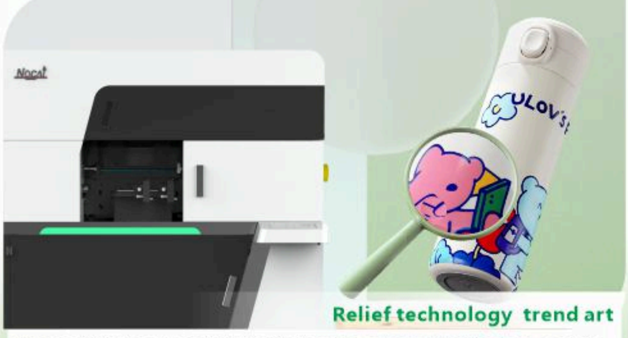
Multi-faceted protection of the print head, lift-type ink station design, precise head sealing, the machine head is equipped with an infrared anti-collision sensor, the ink truck automatically stops when touched, and multi-faceted protection of the print head.

Diverse effects



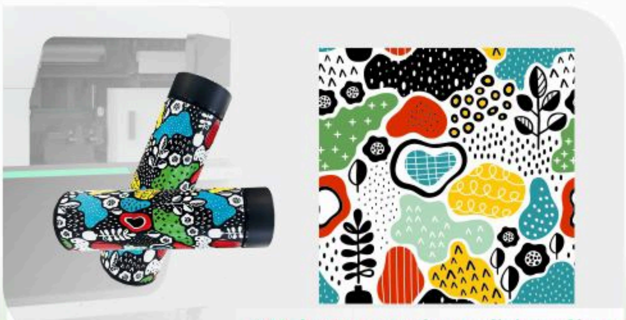
Various colors and stable output

Adopting ICC color control technology, it is not limited by picture colors and can easily print multi-color, gradient and other effects. Accurate color control can be achieved during the production process.



Relief technology trend art

The software can set various modes and is simple and easy to understand. Increasing the amount of ink can make the relief effect more obvious, the partial gloss effect to highlight the layering, and the full-width gloss effect to be scratch-resistant and wear-resistant.



360 degree seamless splicing effect

The software adds a seamless splicing algorithm, which allows you to easily achieve a seamless splicing effect after setting the size. It is easy to operate and the effect is stunning.

Materials are widely used and have good adhesion

Supports a variety of printing materials, such as frosted/ smooth paint, stainless steel metal, plastic, bamboo, ceramics, wood, etc., with running water UV lamp control technology, segmented temperature control, and adhesion is fully guaranteed.

Applications

Thermos cup and pot industry

Car cup/Coke cup/Children's cup/Pocket cup/Simmering kettle/Insulated kettle/Egg cup/Beer cup/Coffee cup/Sports water cup/Straight thermos cup, etc.

Wine industry

Wine bottle caps/ceramic wine bottles/metal wine bottles/spray-painted wine bottles, etc.

Packaging materials

Cans/tea cans/vacuum toothpaste bottles/spray bottles, etc.

Household products

Flower arranging holder/pen holder/plastic cover for small household appliances/cylindrical small speaker, etc.

Green plant decoration

Ceramic flowerpots/small ceramic vases/cylindrical glass bottles, etc.

Product parameters

Model number		NC-CylinderElf-Ⅲ	
Print head		XAAR 1201*3pcs standard	XAAR 1201*4pcs optional
Print length		80-280mm	
Cylinder/cone printing diameter range		Φ45-160mm	
Nozzle spray force range		2-13mm	
Number of nozzles		1280pcs	
Distance between nozzles		42.3um	
Number of nozzle rows		4	
Maximum number of supported ink colors		4	
Ejection frequency		Single highest 50khz	
Droplet volume		2.5pl	
Taper printing range		<5°	
Print version		White and color and varnish print at same time	
Print mode		CMYK+W+V	CMYK+Lc Lm Lk Llk+W+V
Resolution		720*1200dpi	960*900dpi / 960*900dpi
Printer dimension	L*W*H	1320mm*915mm*1340mm	
N.W.		240KG	
Chiller weight		13KG	
Packing size	L*W*H	1.84m*1.12m*1.61m	
G.W.		380KG	
Rip software		RIIN	
Print speed range		30s-3min/pcs	
Graphic format		Tiff,Jpg,Eps,Pdf,Png,AI	
Connection method		Network cable	
Power		AC220V±10，50HZ~60HZ	
Rated power		1100W	
Working environment	Temperature	20℃-28℃	
	Humidity	35%-65%	
Operating conditions	Dust	Avoid dusty environments	
	Illumination	Avoid direct sunlight	
Ink type		Environmental UV curing ink	
Taper electric adjustment function		Yes	
Height measurement function(modeling of special-shaped products)		Optional	
Carriage and print head anti-collision		Intelligent anti-collision of laser aiming	
Printing material sensor		Optical fiber amplifier	
UV curing method		Water cooling	

Computer configuration requirements:

Operating system:Windows 7/8/10/11 (64 bits)
CPU processor: recommended i5, i7 and above
Memory: 16G or above recommended
Monitor:Recommended resolution 1024*1280 or higher
Hard disk type: 128G or above
Graphics card:Motherboard integrated graphics or independent graphics card
(4GB video memory or above)
Network card: Gigabit network card 1000M

*Computers, computer desks, and machine bases need to be self-provided
