NC-UV0609PEIII-II

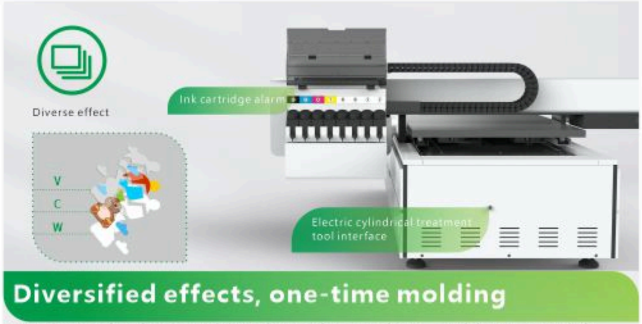
High Cost Performance Digital Inkjet Printer

NC-UV0609PEIII-II is a flow product of Nocai UV0609 series. This machine has the advantages of high cost performance, diverse functions and strong stability, and is very suitable for small batch production needs. The application scenarios are diverse and suitable for industries such as advertising, gifts, stationery, handicrafts, and packaging.

Features

High precision and durable print head

Epson I1600-U1 uses a unique MEMS technology manufacturing process to achieve high-precision nozzle arrangement. The unique VSDT (Variable Ink Droplet Technology) can freely control the size of the ejected ink droplets, presenting more picture details, smooth color transition, and high saturation.



Diversified effects, one-time molding

A variety of color combinations, four colors + white + varnish, with diversified effects and no color restrictions. Color, color white, embossed varnish and other printing can be printed in one time.

180mm print height

It supports product thicknesses of 0-180mm, meeting the printing needs of products of different thicknesses, without material restrictions, and has a wide range of applications.

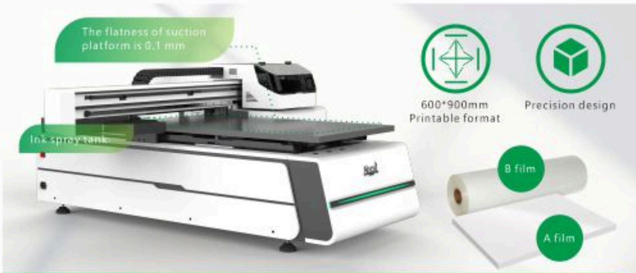
Strong stability, green and environmental friendly

The design of the lifting and lowering ink station accurately controls the head position and comprehensively protects the print head. Using UV ink, bright colors, green and environmentally friendly.

Electric cylinder treatment
Multi-purpose use Support surface
Personalise

One machine with multiple uses for individual needs

One machine has multiple functions. It can be equipped with an electric cylinder jig to achieve 360-degree rotation printing. It can print mugs, thermos cups and other cylindrical products to meet diverse personalized needs.



The flatness of suction platform is 0.1 mm
600*900mm Printable format
Precision design
Ink spray tank
B film
A film

Fine design, pursuit of perfection

The high-precision honeycomb hard air-suction aluminum platform is used to allow the product to be adsorbed flatly on the platform to ensure the printing effect. The printing format is 60*90cm, which is very suitable for small batch production.

Humanized design and easy operation

Telescopic control panel, easy to operate. The control panel has various functions and the display is simple and easy to understand. Commonly used functions such as testing, cleaning, and stopping are all available with one click.

Safety, worry-free and quality assurance

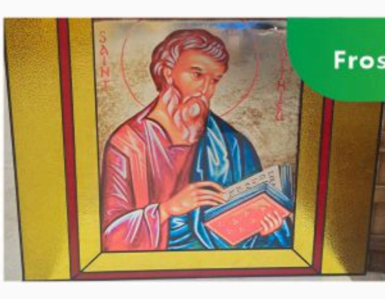
The print head is equipped with an intelligent touch and anti-collision sensing device. The ink truck automatically stops after being touched, thus protecting the print head and printing materials.

Industry application and effect display

DTF effect

Use a UV printer to print on the crystal label A film, use a laminating machine to transfer the B film together at high temperature, and the crystal label can be formed.

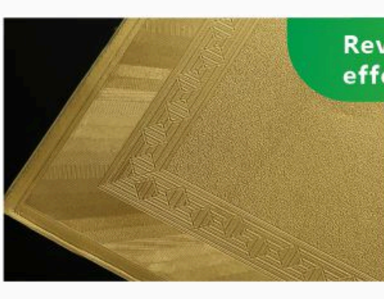
The crystal label process is not limited by material or product shape, and can be pasted on various materials, such as wood, acrylic, ceramics, glass, metal, plastic, etc., and is widely used.



Frosted effect

Print colors directly on transparent/white materials to create a matte effect.

Product applications: cards, personalized gift lamps, customized glass sheets, transparent plastic films, motorcycle glass displays, ceramic cups, etc.



Reverse varnish effect

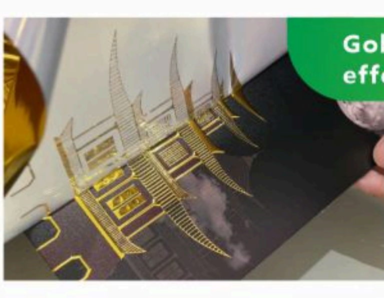
By controlling the amount of light ink and the frequency of UV light, you can print a reverse varnish effect.

The use of reverse varnish effects is generally used in advertising signs, packaging, gifts, etc. In order to produce special effects, Nocai UV printer can easily solve it.

Varnish embossing effect

Use a UV printer to print white ink on the surface of the material. After accumulating detailed unevenness, print colored ink varnish to achieve a relief and bright effect.

The varnish embossing effect is the biggest highlight of UV, which cannot be achieved by other processes. It is used in a wide range of industries: electronic products and peripherals, handicrafts, gifts, advertising, leather goods, etc.



Golden embossing effect

Golden embossing on the surface of the material, and use a laminating machine to transfer the hot stamping film to the material at high temperature to achieve the hot stamping effect.

With the demand for personalized customization, the demand for hot stamping effects has gradually increased. Product applications: gift boxes, labels, cards, etc.

360 degree rotation effect

The cylinder jig can be used to print on cylinder products of various shapes to achieve 360-degree curved surface printing.

The 360-degree rotation effect is mainly used in the field of personalized customization. Product applications: thermos cups, mugs, glass lamps, cylinder electronic products, etc.

Scene requirements

Computer configuration requirements:

Operating system:Windows 7/8/10/11 (64 bits)

CPU processor: recommended i5, i7 and above

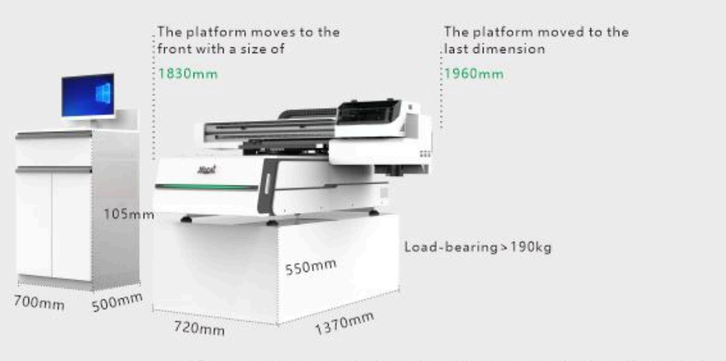
Memory: 16G or above recommended

Monitor:Recommended resolution 1024*1280 or higher

Hard disk type: 128G or above

Graphics card:Motherboard integrated graphics or independent graphics card (4GB video memory or above)

Network card: Gigabit network card 1000M



The platform moves to the front with a size of
1830mm
The platform moved to the last dimension
1960mm
105mm
Load-bearing > 190kg
550mm
700mm
500mm
720mm
1370mm

*Computers, computer desks, and machine bases need to be self-provided

Product parameters

Model number		NC-UV0609PEIII-II
Printhead configuration		Epson I1600-U1*3
Print head picture		
Nozzle spray force range		2-3mm
Number of nozzles		1600（Indivual）
Distance between nozzles		1/300 inch
Number of nozzle rows		4
Maximum number of supported ink colors		4
Droplet ejection performance (droplet volume and ejection frequency)	2 levels of grayscale	5 pl（43.2kHz）
	3 levels of grayscale	6,12.5 pl（21.6kHz）
	4 levels of grayscale	3.8,6.2,9.3 pl（21.6kHz）
Print size		600*900mm
Print height		0-180mm
Print version		White,Color&Varnish
Print mode		CMYK+W+V
Resolution		720*900dpi / 720*1200dpi
Printer dimension	L*W*H	1676mm*1627mm*693mm
N.W.		187KG
Packing size	L*W*H	1.82m*1.83m*0.98m
G.W.		350KG
Rip software		FlexiPRINT MiniServer 19 Nocai Edition
Print speed range		1.64-5.09 square/h
Graphic and text format		Tiff,Jpg,Eps,Pdf,Png,AI
Connection method		Cable
voltage		AC220V/110V±10，50HZ~60HZ
rated power		245W
Working environment	Temperature	20℃-28℃
	Humidity	35%-65%
Operating conditions	Dust	Avoid dusty environments
	Illumination	Avoid direct sunlight
Ink type		Environmentally friendly UV curing ink

Fixture (optional)

Electric cylinder fixture		Support cylinder diameter		Φ30-120mm
Support cylinder length		40~430mm
Applicable materials		Spray paint cup, stainless steel, plastic, glass, ceramic, wood, acrylic, etc.
Round bottle printing method		C+W（Round bottle mode does not support varnish printing)
Round bottle printing speed		3-20min/indivual
Cylindrical fixture packaging dimensions	L*W*H	68*39*14cm
Cylindrical fixture packaging weight		12KG
