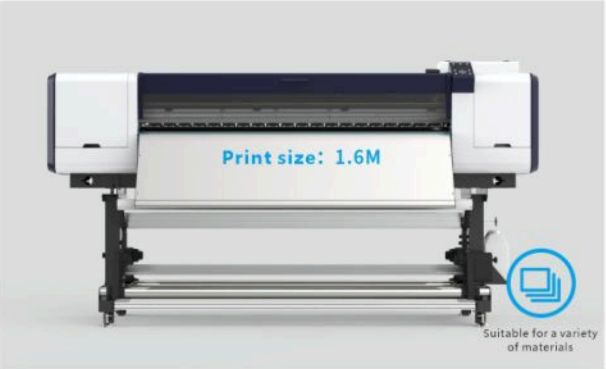
Indoor and outdoor inkjet eco-solvent printer

The latest 1.6-meter indoor and outdoor advertising eco-solvent printer which launched by Nocai has the characteristics of high precision, fast speed and high stability. It is widely used in the advertising industry, such as: advertising light boxes, advertising signs, KT boards, roll-up banners, hanging paintings, wallpapers, car stickers, etc.

Features

8-color printing with bright colors

8-color printing, the picture is more delicate, the color gamut is wider, and the color reproduction is more accurate. Suitable for expressing high-saturation colors often used in the advertising industry.

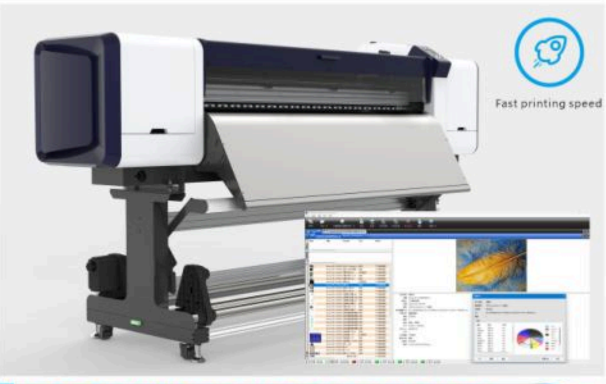


1.6 meters wide, widely used

The printing width is 1.6 meters, which is suitable for most products, such as advertising light boxes, KT boards, roll-ups, photo paper, car stickers, floor stickers, etc.

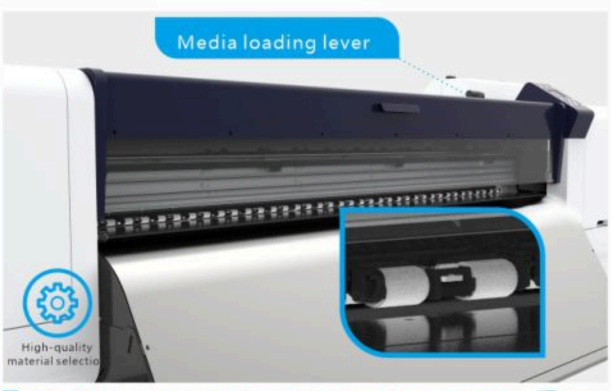
LED lighting intuitive and realistic

Equipped with LED lighting and a transparent front cover with a wider field of view, you can preview the light box effect during the printing process and confirm the printing status at any time.



High efficiency and easy cost accounting

The printing speed can reach 20m/min (4pass) to easily handle large and urgent orders. The software calculates the amount of ink used in detail, making it easier for users to calculate costs.



Craftsmanship, precision and stability

The paper feeding and pressing rollers are integrated into the mold, and the software can freely adjust the paper pressing rollers to prevent static ink flying and uneven paper feeding, making the printing size more accurate.

Versatile functions and easy operation

The control pannel has multiple functions and is easy to operate. Paper settings, lighting, heating, printing and other functions can be adjusted with one click.
